

Chryso® Quad 909

Mid-Range Water Reducing Admixture

DESCRIPTION

Chryso® Quad 909 is a new-generation mid-range water-reducing plasticiser incorporating advanced **Quad CLEAR Technology**. Developed through hybrid polymer technology and the latest molecular synthesis expertise, Quad® 909 provides enhanced consistence retention and reliable performance.

It is specifically formulated for mixes containing **aggregates contaminated with high levels of clay or silt, manufactured sands, and crushed fines**, helping reduce cement demand while maintaining performance. Quad® 909 also remains robust against variations in cement chemistry, ensuring consistent behaviour across diverse materials.

Chryso® Quad 909 offers a wide dosage range and supports a broad spectrum of concretes, including low W/C ratio mixes, high workability mixes, and mixes requiring slump class increases without additional water or cement.

BENEFITS

- Enables use of **highly contaminated aggregates**
- Robust performance with **variable cement chemistry**
- Supports **cement optimisation** without strength loss
- Improved **consistence retention**
- Enhanced **concrete rheology**
- Improved **compaction**
- Increased **concrete strength**
- Suitable for a **wide range of applications**
- Versatile **dosage range**

FIELDS OF APPLICATION

- Aggregates with high clay or silt content
- High-fineness gradings
- Manufactured sands
- High-consistence concrete
- Ready-mix concrete
- Reinforced concrete
- Pumped concrete

Compatibility with Cements

- Compatible with **all cement types**
- Compatible with **PFA** (Pulverised Fuel Ash)
- Compatible with **GGBS** (Ground Granulated Blast Furnace Slag)
- Contact Technical Department for special cement systems

INDICATIVE INFORMATION

Product Nature	Liquid
Color	Brown

METHOD OF USE

Dosage :

- **0.3 to 1.2 kg per 100 kg cement**
- Optimum dosage must be determined through **trial mixes** considering local materials and performance requirements
- Chryso® Quad 909 is **fully miscible in water**
- Must be added **to the mixing water**
- Concrete must be mixed thoroughly to achieve a **homogeneous mix**

NORMATIVE AND REGULATORY INFORMATION

- Chryso® Quad 909 is a **water-reducing plasticiser** with **UKCA** and **CE** marking
- Conforms to **BS EN 934-2 Table 2** (non-harmonised portion)

SAFETY

- Chryso® Quad 909 is classified as **"harmless."**
- Use standard protective equipment.

Chryso® Quad 909

Mid-Range Water Reducing Admixture

Lifetime	12 months
Specific gravity	1,058 ± 0,010

PACKAGING

- 215 L Barrel
- Container of 1000L
- Bulk delivery on request
