

Chryso® Clear Test Reveal 10

Other Product

DESCRIPTION

Chryso® Clear Test Reveal 10 is an innovative liquid solution developed for use in the **Chryso® Clear Test** diagnostic procedure. It enables the identification of sands containing swelling clays, supporting the qualification of fine aggregates.

The product is intended for laboratory or controlled testing environments and is used as part of a defined testing protocol to assess sand quality against relevant standards.

BENEFITS

- Supports identification of swelling clay content in sands
- Enables qualification of aggregates for concrete production
- Designed for use within a controlled diagnostic test protocol
- Assists compliance with aggregate standards
- Simple liquid format for testing procedures

FIELDS OF APPLICATION

Chryso® Clear Test Reveal 10 is suitable for:

- Laboratory testing of fine aggregates
- Qualification of sands for concrete production
- Assessment of sand compliance with relevant standards (e.g. EN 12620)

INDICATIVE INFORMATION

Product Nature	Liquid
Lifetime	12 months

PACKAGING

- 20L Container
- 5L Container

METHOD OF USE

When using Chryso® Clear Test Reveal 10 the below should be adhered to.

- Use strictly in accordance with the **Chryso® Clear Test protocol**.
 - Ensure appropriate laboratory or controlled conditions
 - Refer to relevant aggregate standards when interpreting results
- The product is intended for controlled use within the defined testing procedure. For full methodology, refer to the official Clear Test guidance documentation.

PRECAUTIONS

- Protect from frost
- Store in a dry place
- Keep away from light and sources of heat

SAFETY
