

Chryso® AB 42

Bughole reducer

DESCRIPTION

Chryso® AB 42 is a liquid admixture designed to **reduce bug holes and limit entrapped air** in concrete, improving surface appearance and finish quality. It is suitable for use in both ready-mixed and precast concrete applications.

Chryso® AB 42 can be used with most Chryso admixtures, **except air-entraining agents**, and is intended to support the production of concrete with improved visual quality without adversely affecting standard mix behaviour.

BENEFITS

- Reduces bug holes in concrete surfaces
- Limits the amount of entrapped air in concrete
- Improves surface quality and visual finish
- Suitable for ready-mix and precast concrete

FIELDS OF APPLICATION

Chryso® AB 42 is suitable for:

- All types of cement
- Plastic to fluid concretes
- Ready-mix concrete
- Precast concrete

Compatible with Chryso admixtures

Must not be used with air-entraining agents

INDICATIVE INFORMATION

Product Nature	Liquid
Color	Yellow
Lifetime	18 months
Specific gravity	0,095 ± 0,002

METHOD OF USE

- Typical dosage range: **0.3 – 3.0 litres per m³ of concrete**
- The optimum dosage should be determined by **concrete trial mixes**

Chryso® AB 42 may be used in combination with other Chryso admixtures **except air-entraining agents**.

SAFETY

Chryso® AB 42 is classified as **harmless**.

Normal personal protective equipment is recommended. For further information, refer to the relevant **Safety Data Sheet** before use.

For further information, please refer to the safety data sheet on our internet site www.uk.chryso.com.
